Messenger & Crypto Wallet

- iMe is an alternative Telegram client, developed on the open source code and operating on Telegram API. The app is available on the Apple Store and Google Play.
- iMe involves all the functionality of Telegram with the addition of its own advanced developments and technologies, such as the integrated Crypto wallet and Artificial Intelligence in the form of Neurobots, as well as various conveniences in the form of Topics, as an alternative to Telegram folders, the built-in Google Translator in chats, a functional Cloud with Albums, advanced folder capabilities and many other tools and settings.
- Start your unique journey into the world of decentralized finance with iMe ecosystem based on Lime token, which is designed to create and manage DAO structure. iMe community will have an opportunity to take part in voting and making decisions that affect the development of the project.

Ecosystem of iMe and Lime

Main features

Neurobots

Our Community

iMe community is located all over the world and is constantly growing.
To the end of May, 2021 we have 2 300 000+ app downloads.

ACTIVE USERS:

in 28 days	900k
in 7 days	405k
in 1 day	210k

IME WALLET:

Activated wallets	450k
Active Ethereum accounts	60k

actual data to the end of May, 2021

Crypto Synergy

The integration of iMe with the Ethereum platform provides our users to use decentralized financial instruments on a new level. The combination of a messenger with a crypto wallet makes working with cryptocurrency assets simple and convenient.

Secure cryptocurrency purchases via bank card are provided by a reliable partner Simplex, which implements fiat infrastructure for crypto industry.

Cryptocurrency transfers between users are available directly in chats or via Telegram ID without the need to know the recipient's address. The classic method of transfers to public addresses is also available.

The decentralized Uniswap protocol which is integrated into iMe allows you to swap Ether and tokens to each other through smart contracts, without switching to third-party services. And the inability to add fake tokens into iMe will save users from losses in case of accidental exchange for a fake token. We will add 1inch and PancakeSwap soon.

The Binance Smart Chain integration into iMe will allow to use the technologies for more faster and cheaper transactions.

Lime Token

- As a toolkit for creating a decentralized online service based on blockchain, we have chosen the Ethereum open platform. Ethereum technology enables to register any transactions with any assets based on a distributed base of blockchain-type contracts. Also, we are implementing a smart contract for the bridge to enable Lime to operate on Binance Smart Chain.
- Lime is a crypto token of the iMe project (Ethereum token of the ERC-20 standard). In total, 1 billion Lime will be issued. Lime release is scheduled for the 2nd quarter, 2021.

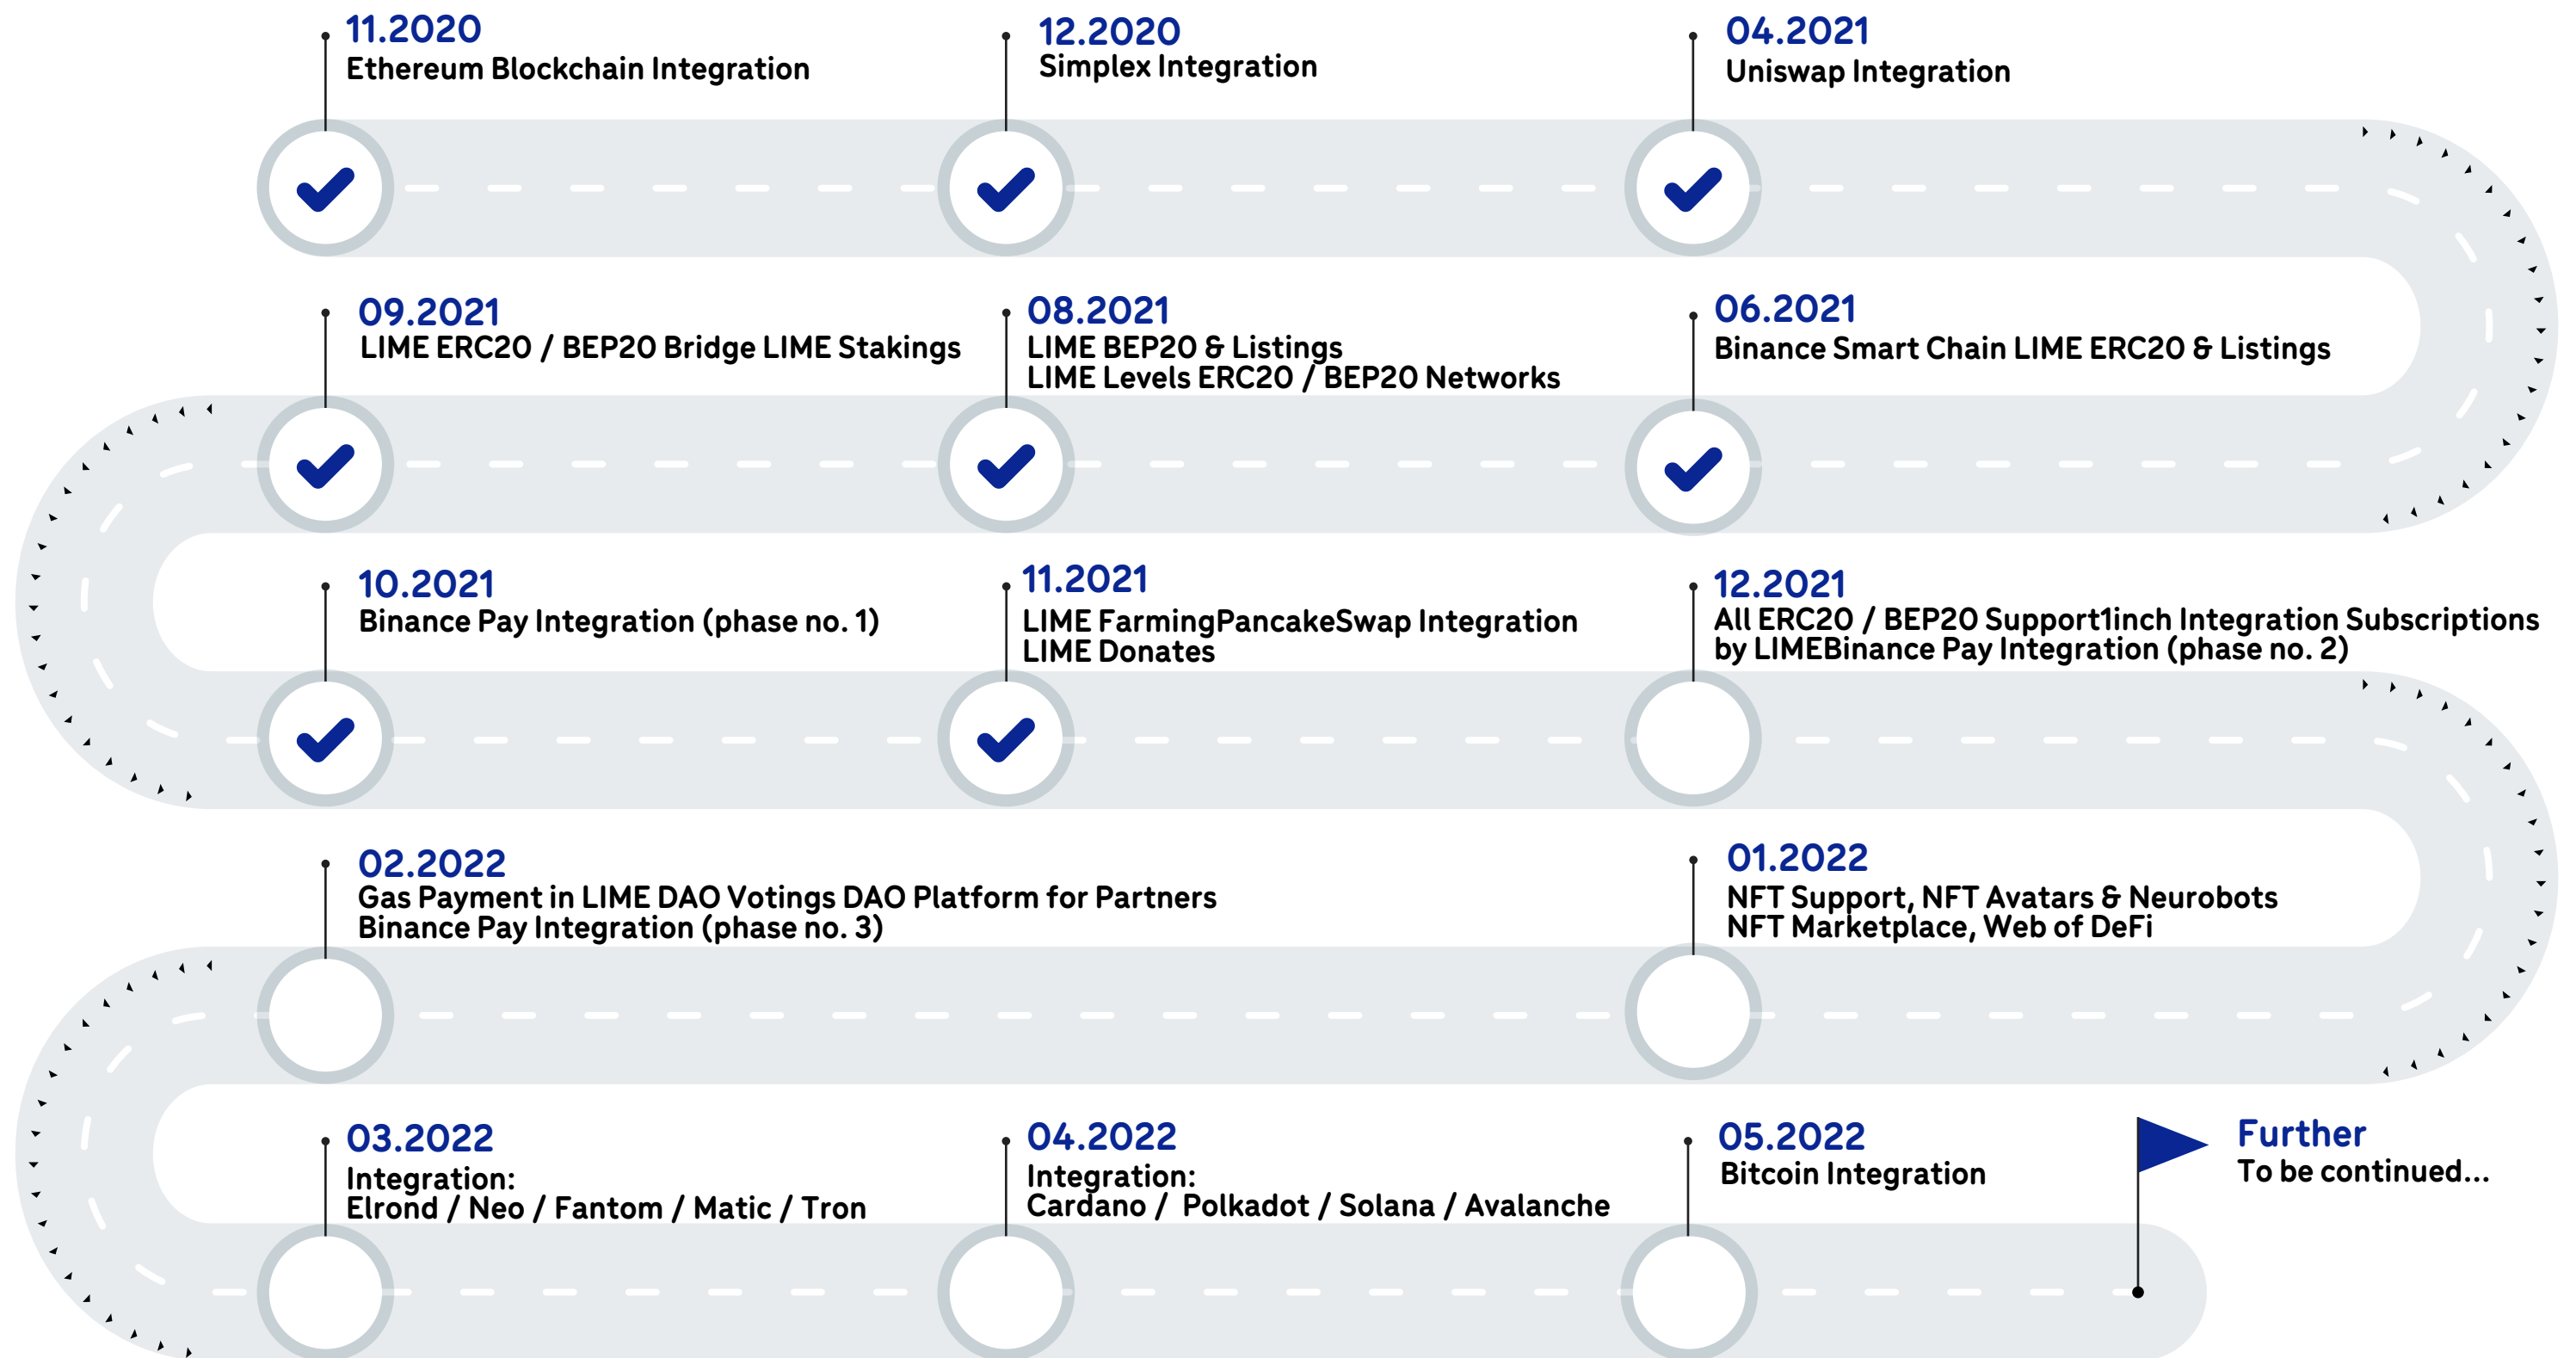

Token Metrics

DISTRIBUTION	TOTAL, %	TOTAL, LIME	PRICE, \$	FULL LOCK, MONTH	X MONTH VESTING AFTER UNLOCK	FIRST TOKENS AFTER X MONTH AFTER TGE
SEED ROUND	4.80%	48 000 000	0.00550	18	24	19
STRATEGIC ROUND	5.00%	50 000 000	0.00743	0	*	1
PRIVATE ROUND 1	5.00%	50 000 000	0.00825	0	*	1
PRIVATE ROUND 2	8.50%	85 000 000	0.00928	0	*	1
IDO	0.40%	4 000 000	0.02	0	-	1
FUTURE DEVELOP	35.00%	350 000 000	-	6	36	7
LIQUIDITY	4.10%	41 000 000	-	0	-	1
MARKETING	27.20%	250 000 000	-	6	36	7
TEAM	7.50%	97 000 000	-	24	36	25
ADVISORY	2.50%	25 000 000	-	12	18	13
AVAILABLE	100%	1 000 000 000				

* The distribution conditions for STRATEGIC ROUND, PRIVATE ROUND 1 and 2 have been changed. The first part was sent according to schedule, right after TGE, later on the 30th of October, 2021 the second part was allocated via claim on the smart contract. The remaining part will be distributed by linear vesting, the beginning of vesting and it's terms will be announced later.
